(a) the total amount of foreign exchange that the country has earned through export of biotech products during the last three years;

(b) whether it is a fact that the market size of biotech products is growing very rapidly in the world; and

(c) if so, the details thereof and the steps taken by the Ministry to encourage FDI in the field of bio-technology?

THE MINISTER OF STATE IN THE DEPARTMENT OF SCIENCE AND TECHNOLOGY IN THE MINISTRY OF SCIENCE AND TECHNOLOGY (SHRI BACHI SINGH RAWAT): (a) to (c) Sir, India is exporting products developed by traditional and new biotechnology. The exported products include diagnostics, human and veterinary vaccines, toxins and bacterial products, blood products, anti-biotics, tissue culture plantlets, enzymes medicinal plant products, mushrooms, cut flowers etc. During last three years about Rs. 1074.62

crores worth of biotech products were exported by India. Major share of this export comes from products of traditional biotechnology. The global scenario on market size and biotech product range is under constant change and is increasing at a rapid speed. The Government of India encouraged FDI in the field of biotechnology and in sectors like Drugs and Pharmaceuticals; FDI up to 100% is allowed. For speedy implementation of approved FDI projects in all sectors including biotechnology, Government of India has constituted Fast Track Committees (FTC) at Administrative Ministry level under Foreign Investment Implementation Authority (FTIA) in the Ministry of Commerce and Industry.
